

# chemo area of the future

## ENHANCING WELL-BEING OF BREAST CANCER PATIENTS

Enhance the psychological well-being of female breast cancer patients during chemotherapy by making them feel less uncomfortable and distract them from the negative feelings as much as possible.

Know, then, whatever cheerful and serene supports the mind, supports the body too.

~ John Armstrong

The interaction should be peaceful, relaxing and effortless. It should be like sitting by a lake.

peaceful

relaxing

effortless

## final design and interaction scenarios

### INTERACTION WITH PATIENTS

Turning the chair towards each other, stimulates and enhances communication.

### INTERACTION WITH COMPANION

Many patients bring a companion with whom they interact.

### INTERACTION OF COMPANIONS - PATIENT WANTS REST

Companions gather together to share their experiences.

When you treat a disease, first treat the mind.

~ Chen Jen
