

DIPO

The digital polaroid app

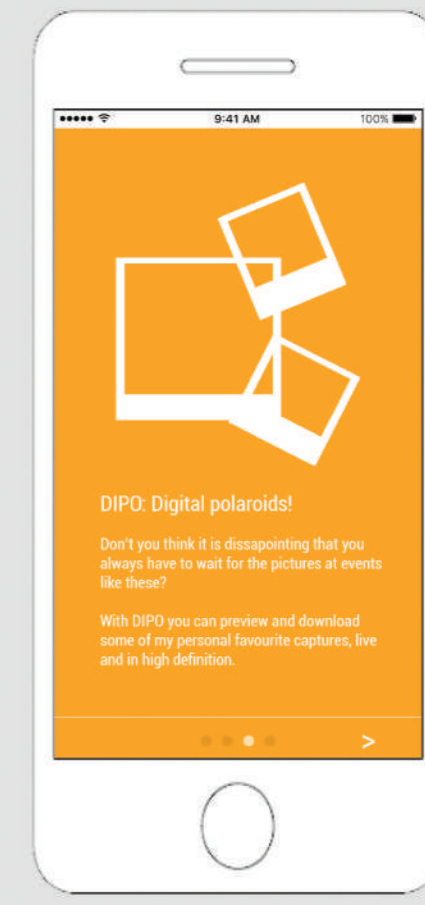

This is DIPO, the world's first digital polaroid application. It enables professional photographers to share captures during events before computer finishing the pictures afterwards. Thanks to DIPO, event attendees establish a bond with the photographer, feel positive confirmation surrounding the pictures and receive some control over the process. This makes them feel more safe and comfortable when being photographed at events. But most of all it is fun and easy to use!

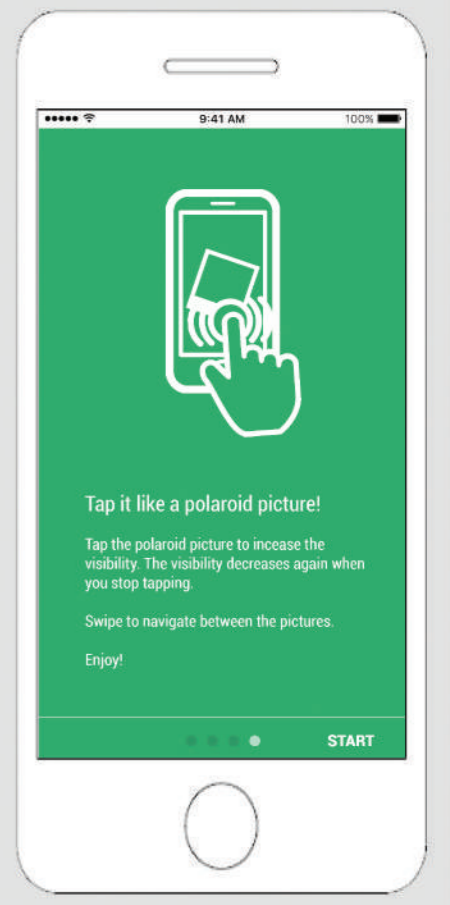

Professionally bonding

Sharing knowledge

Enthuse

Introducing

"I want people at company events to feel safe when being photographed"

Event has not yet started!
This event starts 17:30. Please come back later for live and high quality digital polaroids.
Take me back!

Implement app before events and start bonding with the user already.

Experience high quality pictures

Tap to increase the polaroid's visibility
Start to like the photographer through his friendly polaroid titles

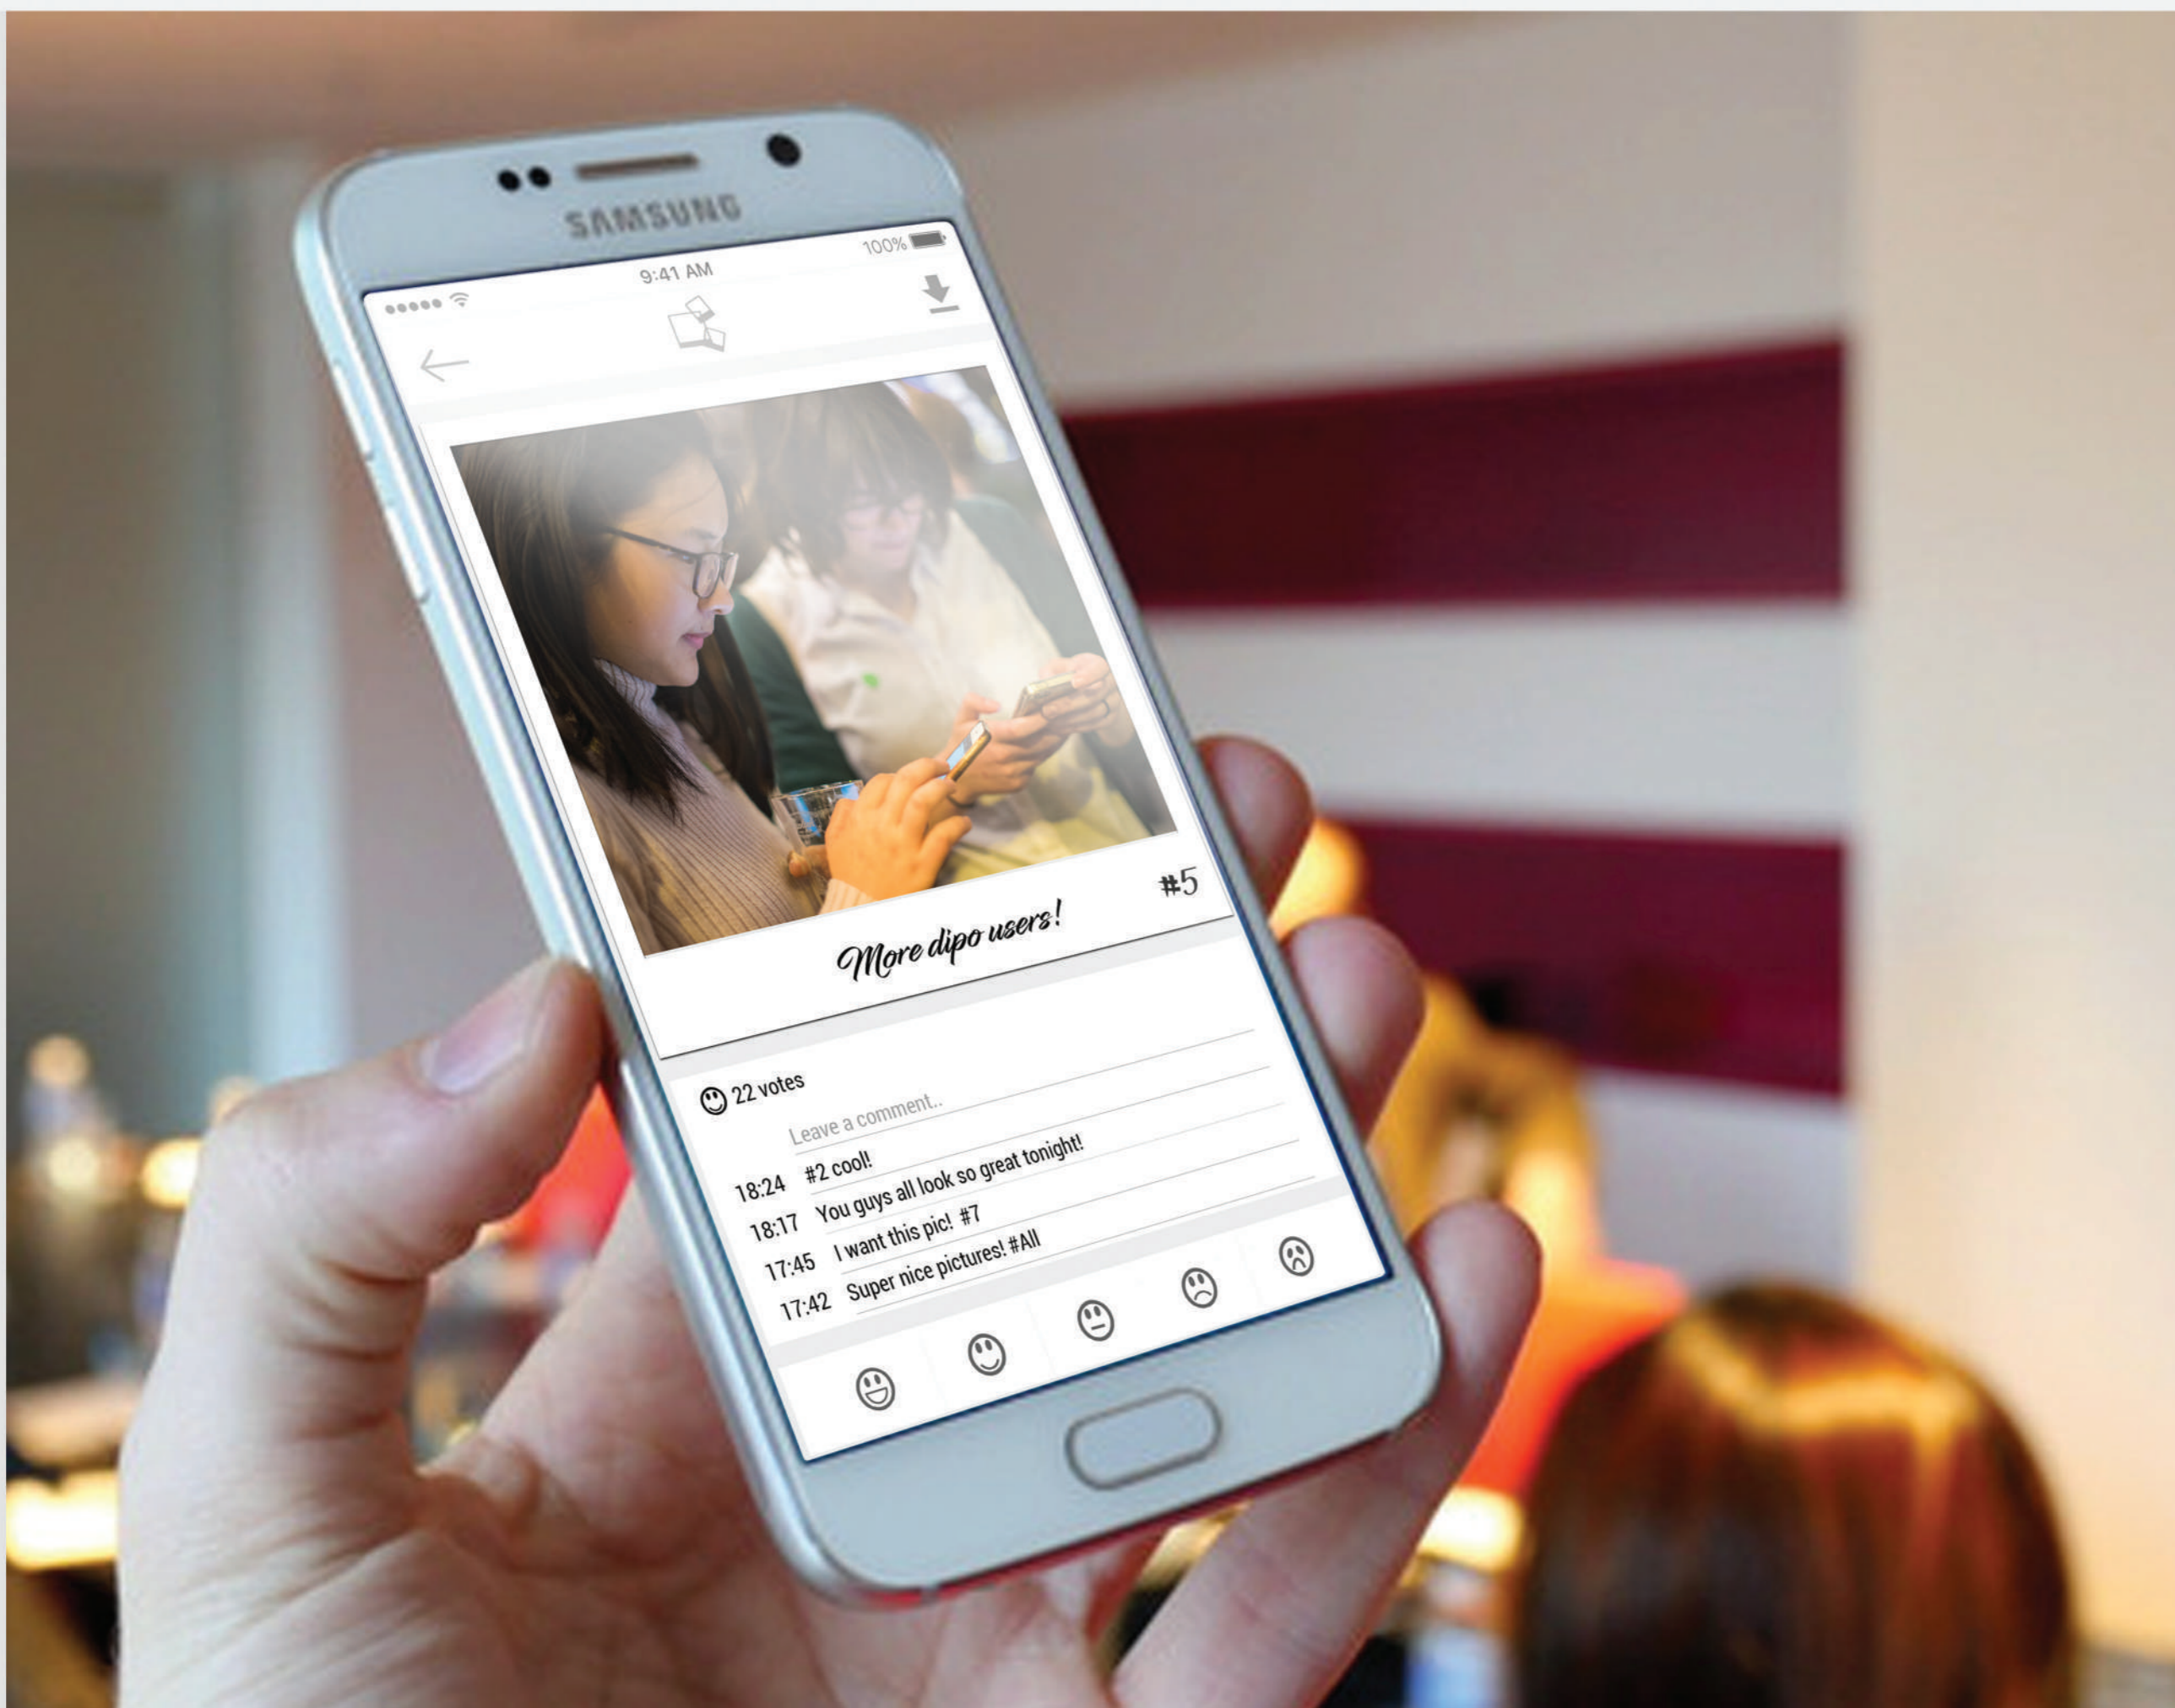

Download completed!
Your digital polaroid has been downloaded to your device. Share this moment with other people so it will be remembered. **Great!**
No secrecy, save and share the pictures.

Enjoy positive confirmation in the comment section

Take back some control. Vote to give the photographer feedback

The photographer uploads his favourite photographs.

The users can see the pictures, comment, download and share their vote.
