**LET'S GO
TO THE
FOOD BANK!**

Studio Kiddo is a mobile installation that provides clients of the food bank with an engaging activity in a dynamic setting in order to make receiving their food package a more joyful experience.

The base of the installation is made in a cargo bike so it can be transported easily and pop-up at a different pick-up location of the food bank in Delft every week.

Studio Kiddo is located directly outside the food bank and can be used by everyone. The concept had been especially designed to be attractive for kids. Parents or other clients are motivated to join right before or after they receive their food package and to make social contact with others while doing so.
