

Activity 5.2: Take action to improve thermal comfort in the classroom

Students will develop and implement actions that relate to improving thermal comfort in the classroom and then evaluate and reflect on their success and their learning.

Guide:

Steps of the action process

1. Make the case for change
 - explore the sustainability issue
 - assess the current situation in the school
 - investigate concepts and ideas relating to the sustainability issue
 - state the case for what needs to change in the school and why
2. Explore options for action
 - generate ideas and explore options for making a change
 - identify available resources and constraints
 - select ideas for action
3. Develop the proposal for action
 - develop the statement, the brief, for action
 - prepare to communicate the proposal
 - gain agreement on the proposal from stakeholders including the principal
4. Implement the proposal
 - put the proposal into action
 - monitor and record the implementation
5. Evaluate and reflect
 - evaluate the sustainability action
 - reflect on the learning

This activity will be adapted from the following source. A more detailed list of instructions can be accessed via the following link:
